Future Internet Summit 2016

Software-defined and secure networking technologies for hyper-connected society

Date 18 Nov. 2016

Venue Meeting Room 7, BEEFORUM, Seoul, Korea

Co-hosts FIF, KISA

Organizer OSIA

Co-sponsors MSIP, KICS, KIISE

Greetings

It is our great pleasure to welcome you to Seoul, Korea for Future Internet Summit (FIS) 2016. FIS aims to provide a venue where Internet researchers in Asia, Europe, and North America share their current research activities and discuss long-term research visions. As many of us already are witnessing everyday, we live in the hyperconnected society. This opens up many new technical and social challenges from PHY technologies to application services. In FIS 2016, we hope to explore how we tackle those challenges and reshape the Internet accordingly. Thanks for your support and participation.

DongMan Lee (Chair, FIF)
